Calochortus

Calochortus

(Globe Tulips)

Often referred to as Fairy Lanterns; the shape of the flowers and the way they hang on the stem suggest the name. Plants are much branched and bear a number of exquisitely tinted flowers on long, leaf-wrapped stems. Globe Tulips are natives of woodlands, so should be planted in any friable soil mixed with plenty of leaf mold. They like some shade but not full shade. Fine subjects to naturalize in the rock garden or in shaded woods, but they must have perfect drainage. Plant bulbs 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections, provide winter protection. Bloom in May and June.

9376 Albus White with some bronze and pinkish tinging. 18 to 30 in.

BULBOUS IRIS

A glorious display of blue, white, bronze, and yellow flowers in June if you plant the bulbs of these beautiful Iris early in the fall. Flowers are suggestive of Orchids. Bulbs, for best results, should be planted early (September or October) in well-drained, sandy loam, 3 to 4 in. deep and 6 in. apart. In cold climates, mulch ground well after it is frozen. It is their nature to root early and often make top growth in December.

Dutch Iris Flowers are larger, broader; and the falls usually wider apart than the Spanish type; they come into bloom one to two weeks earlier. Beautiful in the garden; lovely for cutting. Valuable for greenhouse forcing.

How to Grow Tulips

Outdoors: Tulips, except Botanical (Species), should not be planted in soil in which they had been grown the last two seasons. Select a new location. Do not use fresh manure at planting time; well-rotted manure or bone meal may be used. Plant bulbs 5 to 6 in. deep and 6 to 8 in. apart.

Indoors: A mixture of $\frac{2}{3}$ good clean garden soil and $\frac{1}{3}$ leaf mold to which a little bone meal has been added gives the best results. A 6-inch pot will hold about 6 bulbs. Place bulbs about 1 in. apart each way. Cover with an inch of soil, and water thoroughly; then put pots in a cold-frame or heel-in in the garden for eight to ten weeks to force root development. Bring pots indoors, first in a cool location and gradually to the average living room temperature. Complete Cultural Directions for the growing of Bulbs for Winter and Spring Blooming are plainly given on every package.

Marechal Niel Double Early Tulips—the rich, mellow yellow, salmon and orange tones of the flowers make them especially desirable for bedding

Giant Ideal Darwin Tulips

Ideal Darwins are an improved type of the wonderful Darwin, with flowers, in many instances, 25 to 30% larger, stronger stems and clearer colors. They begin to flower several days before the regular Darwins and usually last for a longer time. They are truly magnificent, and we can highly recommend them to you.

The *Giant Ideal Darwin Tulips* offered on this and the opposite page have been selected from a long list as the most outstanding and best of the group after several years of testing on our Fordhook Farms. There are many other lovely Ideal Darwins, but on account of a limited quantity of bulbs being available, the prices are necessarily high. Just as soon as stocks become more plentiful and prices come down, we will add more of them to our list. Every variety offered by us has been proved on our trial grounds and we can highly recommend each and every one. Be sure to try some.

They are wonderful for planting in masses in beds or borders, in clumps of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery, and what could be lovelier for cutting?

For a full range of colors in late Tulips, the Ideal Darwin, Breeder and Cottage varieties should be included in your plantings, as each class has its own range of colors, and all three bloom at approximately the same time. The height given for each variety is average, and some variation is natural in different localities and seasons.

Giant Breeder Tulips

Breeder Tulips are of the same tall, stately growth as the Darwins, require the same culture, bloom at about the same time (during the month of May), but come in colors not found in that or any other class of Tulips. Their rich and unusual blendings of purple and old gold, bronze and terra-cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet-scented. All are splendid for cutting and should be included in every garden display. They begin to flower when the Single and Double Earlies are going off. Heights given for each variety are average; they may vary in different localities and seasons.

Cottage or May Flowering Tulips

Cottage or May Flowering Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Early Singles have passed, hence the name, "May Flowering." The term "Cottage" is of recent origin, and so called because so many were planted around the country homes and cottages of England. As a class, they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips.

Cottage Tulips are as varied in their range of colorings as the Darwins but different in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors.

Heights given are average and may change according to locality and season.

Giant Flowered Hyacinths

The Finest for Beds and Borders and for Growing Indoors

Among the many flowers that can be grown from fall-planted bulbs the Hyacinth stands at the top of the list. It is probably the easiest flower to grow in pots or bowls, and what could be more decorative or attractive than a display of Hyacinths in the house during the winter or early spring! Equally effective and beautiful are beds, borders or groups of Hyacinths here and there among perennials or in front of shrubbery. One of the easiest flowers to grow anywhere. From a long list of named Hyacinths we have selected those offered on account of their free-flowering qualities and distinct colors.

How to Grow Hyacinths

Outdoors: Plant Mammoth bulbs 6 to 7 in. deep, 8 in. apart; Medium size bulbs, 6 in. deep, 6 in. apart.

Indoors: One bulb is usually planted in a 5- or 6-inch pot, depending on the size of the bulb, although 4 bulbs may be planted in a 6-inch pan or 6 in a 7-inch pan. Use only the Mammoth size bulbs for growing in water in the house. French Roman Hyacinths should not be planted outdoors in cold sections; they are easily grown in pots or bulb-pans in the house during the winter.

Mammoth Size Bulbs for Giant Spikes

Narcissus or Daffodils

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus, the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the giant trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types are referred to as Narcissus. Botanically these smaller or medium trumpet Daffodils are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types.

Some gardeners apply the name Jonquil to the giant trumpet Daffodils, but this is misleading, as Jonquils are small flowered, sweet scented, have foliage of about the same thickness as width (rush-leaved). Other Narcissus have flat or grass-like leaves.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden.

As Narcissus bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses in beds or borders, in groups of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Narcissus are also ideal, easily grown subjects for winter blooming in the house.

How to Grow Daffodils

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot, barely cover the bulbs with soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

Daffodil

Medium Trumpet Daffodils

On this and the next page we offer a choice assortment of Daffodils whose trumpets are not so long as the perianth segments. In this group, where the trumpet is greatly reduced in size and cupped, we refer to it as a "cup"; where trumpet is shortened but expanded or broadened, we call it a "crown."

The Medium Trumpet class is divided into three groups —Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group as to their distinguishing characters.

Barrii Daffodils

In this group, the cup or crown measures less than one-third the length of the perianth segments. For this reason they are often referred to as "Short-cupped Daffodils." They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

9424 Alcida Giant flower, pure white perianth, and wide citron-yellow cup edged orange. Free blooming. Showy and attractive. 20¢ each; 3 for 55¢; 12 for \$2.00; 100 for \$14.00.

Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, delightfully scented, and usually borne in clusters of two or more on strong stems. Some varieties produce their much prized blooms above the erect and rush-like foliage, while others are about level with the tops. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

9479 Single Jonquil (Simplex) The true single Jonquil with the fragrance of the honey locust. Each stem carries a cluster of 3 to 8 rich golden flowers. Indispensable. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

An ideal variety for garden display, house culture or cut-flower use. 18¢ each; 3 for 45¢; 12 for \$1.50; 100 for \$10.50.

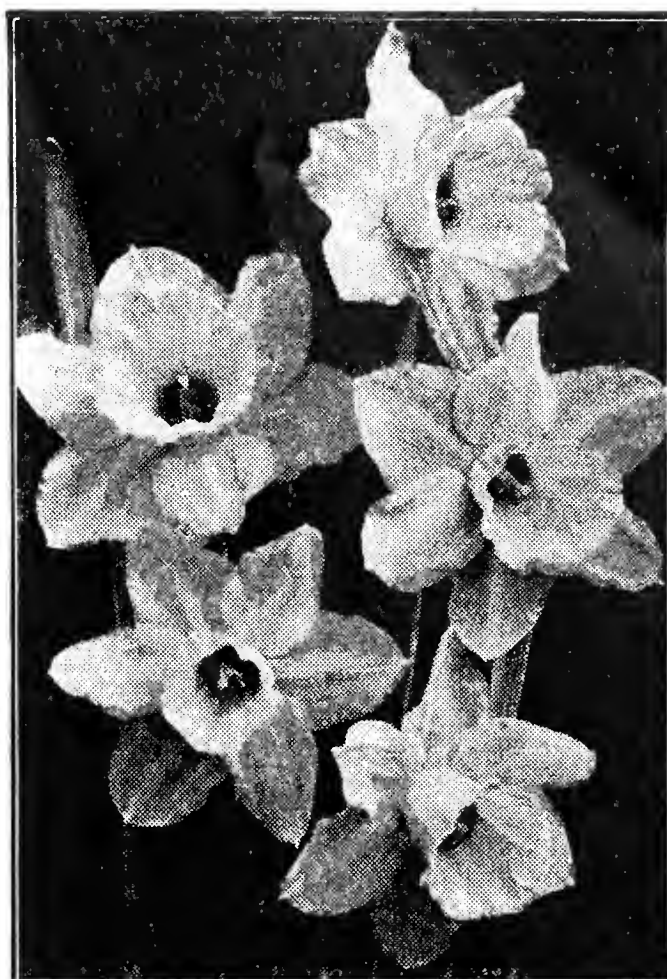

9483 Golden Sceptre One of the finest of the new Jonquil hybrids. Flowers are deep Jonquil-yellow, 3 in. or so across. 9468 Giganteus Campernelle The largest flowering of all Campernelles. The deep yellow, fragrant flowers are borne freely in clusters of impressive size. Early blooming and a favorite for all purposes. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

Paper White Narcissus
12 for 55¢; 100 for \$3.75.

Polyanthus Narcissus

The popular flower for growing in the house during the winter and early spring either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after October 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place.

Polyanthus Narcissus may also be grown in soil. **They are not suited to garden planting** except in frostless localities.

Hardy Garden Lilies

Fall is the best time to plant Hardy Lily Bulbs. Candidums are ready in September, others in late November or early December. If you live in a locality where the soil freezes up early, prepare your bed, cover with manure, leaves or straw to prevent freezing until bulbs arrive, and then plant promptly. After planting the bulbs, do not put back the manure, etc., until the ground has frozen. Candidum Lilies must not be planted deeply—two inches of soil over the bulbs is sufficient; cover others to the depth of three times their diameter.

Easter Lilies

Popular throughout the world, loved and admired by everyone. We offer three varieties that are *ideal for indoor growing*—Harrisii, Longiflorum giganteum, and Erabu. Use a 5- or 6-in. pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60°. Ideal garden subjects in frost-free locations.

8614 Erabu (Japanese Easter Lily)

Improved type of the well-known *Lilium Formosum*, with uniform dark colored stems. Often called "Black-stemmed Formosum." Plants are of healthy, strong growth, about 3 ft. high, and bear their magnificent flowers in whorls at the top of the strong stems. Flowers are large, trumpet-shaped, 6 to 8 in. long, pure waxy white and sometimes tinged with green near the base; the anthers are yellow, which adds to the beauty of the blooms.

Erabu Lily is largely grown for Easter forcing, having practically replaced the old Formosum. They are delightfully fragrant, and if cut when partially open, can be kept for two weeks. Gets its name because nearly all of the bulbs are grown in the Erabu Isles. Ready for delivery in October. 30¢ each; 3 for 80¢; 12 for \$2.75; 100 for \$20.00.

Bermuda Easter Lily

Large bulbs: 30¢ each; 3 for 85¢.
 Extra large: 50¢ each; 3 for \$1.40.

Bermuda Easter Lily

(*Lilium Harrisii*)

Quick to come into bloom; may be forced for Christmas, but it is for Easter that it is so extensively planted. The plants grow about 3 ft. tall and produce 5 to 12 or more large, trumpet-shaped, fragrant, waxy white blooms with contrasting yellow anthers. Ready for delivery from August to December.

8602 LARGE BULBS: Usually produce 5 to 10 large flowers per plant. 30¢ each; 3 for 85¢; 12 for \$2.95; 100 for \$22.00.

8601 EXTRA LARGE BULBS: Will produce more flowers per stem. 50¢ each; 3 for \$1.40; 12 for \$5.00; 100 for \$37.00.

Giant Easter Lily. 30¢ each; 3 for 85¢.

8612 Giant Easter Lily

(*Lilium longiflorum giganteum*)

The flowers are of the purest white and the largest of all Easter Lilies. The plant is of sturdy, stocky growth and largely forced for Easter, but is just as valuable for later flowering. We handle the "Northern or Saitama grown" bulbs, as we consider them the best. They are ready for shipment in November. 30¢ each; 3 for 85¢; 12 for \$2.75; 100 for \$20.00.

All bulbs offered on this and opposite page are not hardy so must be grown indoors except in frost-free locations.

Perennial Flower Seeds

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better, so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag. The Burpee leaflet, "Perennials from Seed," sent **Free** upon request.
